come home to Tarmac

Residential areas have **unique requirements** when it comes to surfacing. Residents want good looks and longevity. Developers want **high performance, toughness, versatility, durability and cost-effectiveness**. With Tarmac's range of asphalt for residential applications, **both parties are satisfied**.

real quality in the real world

We take quality seriously. So seriously that we take the trouble to train contractors to lay our products properly. We know the products are special and we want to ensure they perform to their best.

It makes sense for any housebuilder to put the best materials down in order to avoid having to replace or repair them at a later date - a situation that could reflect poorly on the housebuilder. At Tarmac, we are constantly aware that everything we do reflects on your company's image, therefore we strive for excellence at all times.

For additional information including product and safety datasheets please contact your local sales representative or our marketing department on 01902 382632

innovation as standard

The development of the suite of Tarmac asphalt products used in residential applications was driven by the increased need for surfaces that could handle the demands of power-steering and the increasing popularity of four-wheel-drive vehicles. Asphalt needed to be stronger, more durable and more resistant to surface fretting. So this is exactly what Tarmac created. Tarmac also developed a range of thin surfacing products, which effectively combine cost-efficiency and high performance.

The new range of asphalts also had to look good. Quality surfacing can make a difference to the feel of a

residential area, a fact that Tarmac recognised and responded to by developing asphalt which holds its rich colour for longer. Not only that but without requiring any special maintenance to keep it looking good.

flexible solutions

Tarmac is experienced and responsive enough to pick up a job at any stage of the construction process. However, you are more than welcome to make use of our expertise at the start of a job, where we can offer solid advice based on real experience so you can make an informed decision about the type of asphalt you need. Whether it's one of our specialist residential asphalts or a conventional asphalt, we will deliver quickly and on time.

Tarmac asphalt products for residential applications: Masterpave, Masterflex, Masterdrive, Masterphalt, Masterphalt P, Mastertint, Mastertint Chippings.
